Wǎ Collection

Wǎ prende vita dai ricordi di un viaggio in Cina, evocando villaggi rurali dove le abitazioni sono caratterizzate da tetti ricoperti da migliaia di tegole irregolari in terracotta, stratificate ed impilate l'una sull'altra. Nel progetto la sezione di ogni singolo elemento viene così ripetuta su una porzione di 9,5 x 18,5 cm che andrà a creare il nuovo rivestimento. Wǎ viene proposta in 4 colorazioni naturali, in gres porcellanato tutta massa.

The Wǎ collection stems from the memories of a trip to China, evoking rural villages where dwellings are characterised by their irregular clay roof tiles layered one on top of the other. In this project, each element's section is repeated on a 9.5x18.5 cm portion, creating the covering. Wǎ full-body porcelain tiles come in 4 natural colours.

Antiche tegole cinesi impilate in verticale, fonte di ispirazione di progetto.
Ancient Chinese roof tiles stacked vertically, a source of design inspiration.

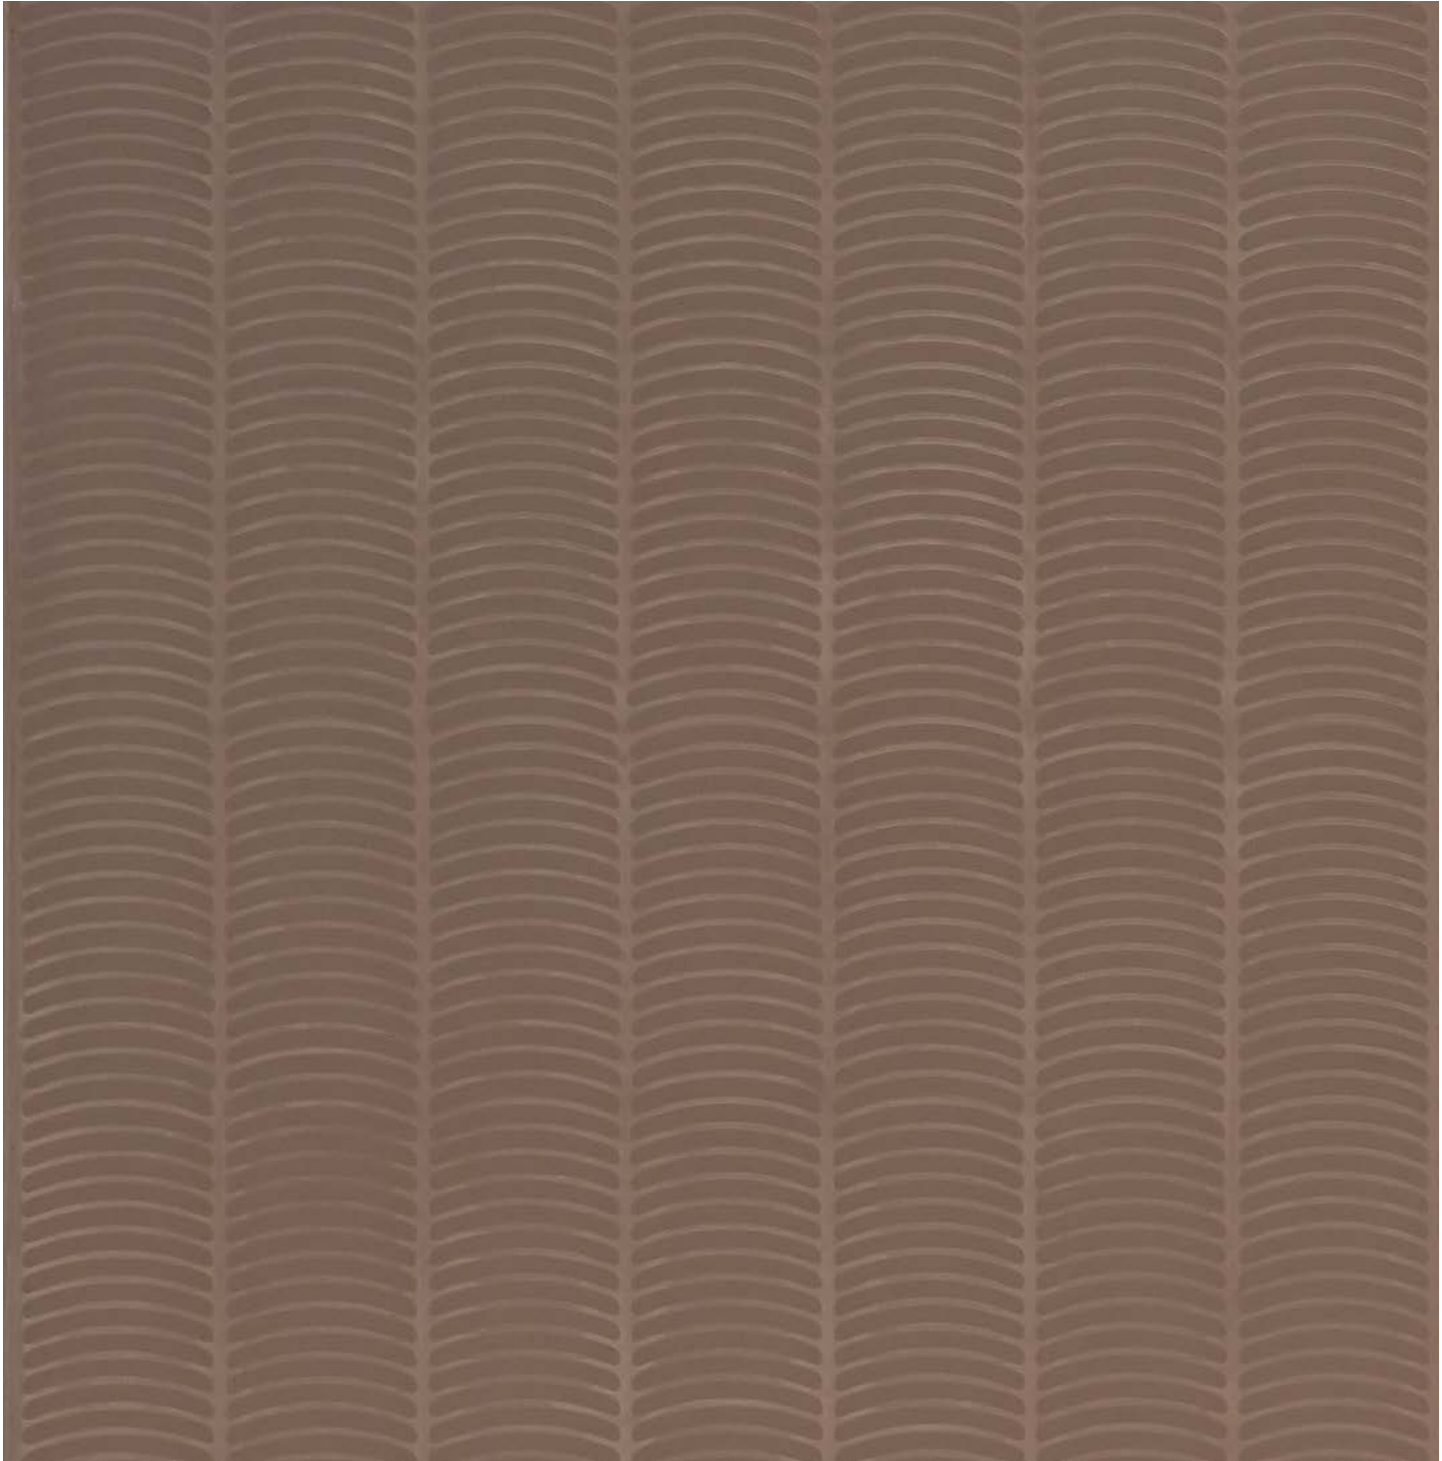

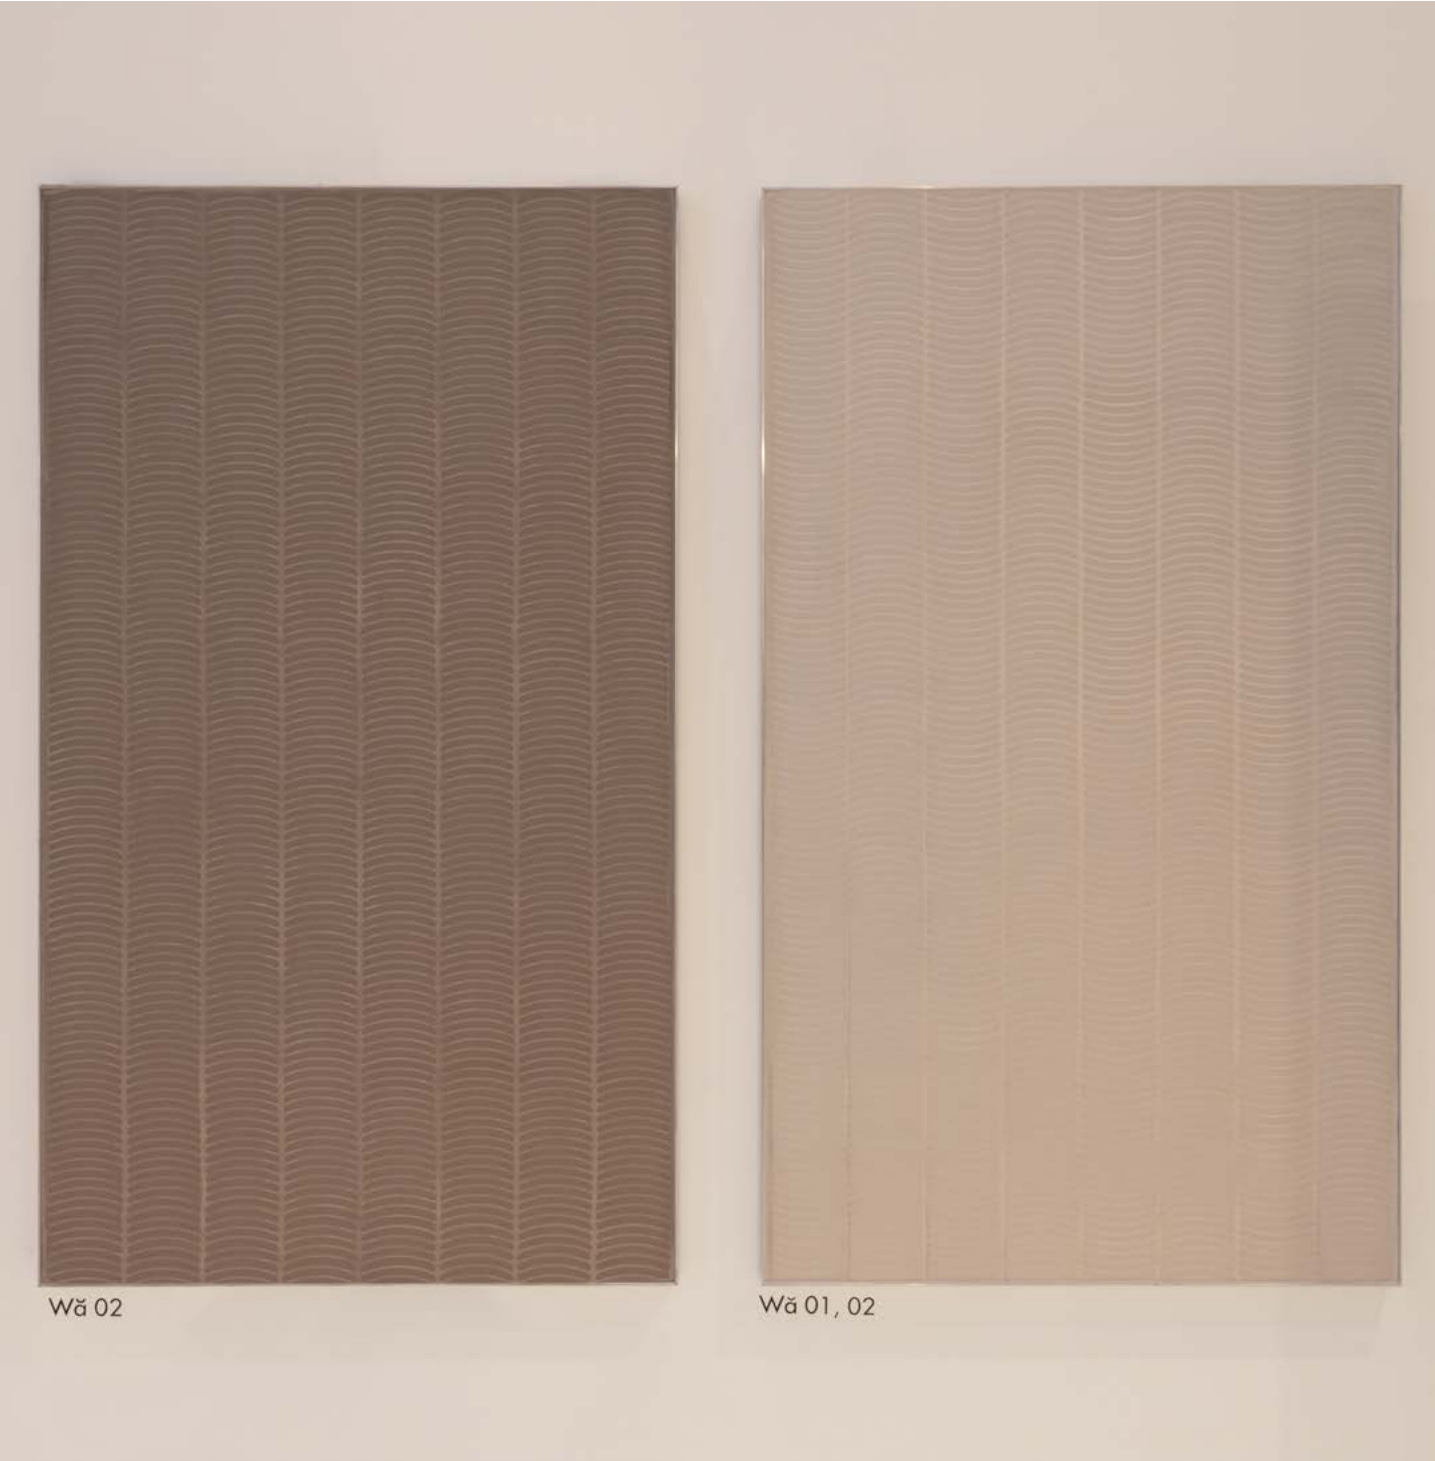

Per poter creare l'effetto mosaico voluto e quindi ricreare la sezione delle tegole, la designer ha esplorato diverse forme fino ad arrivare all'inclinazione scelta. Il prodotto finale, è un rivestimento composto da elementi di 9,5 cm x 18,5 cm, che riproducono le curvature delle tegole cinesi impilate, che tra un listello ed un altro vengono colmate con stucco per creare un effetto di continuità come in un mosaico.

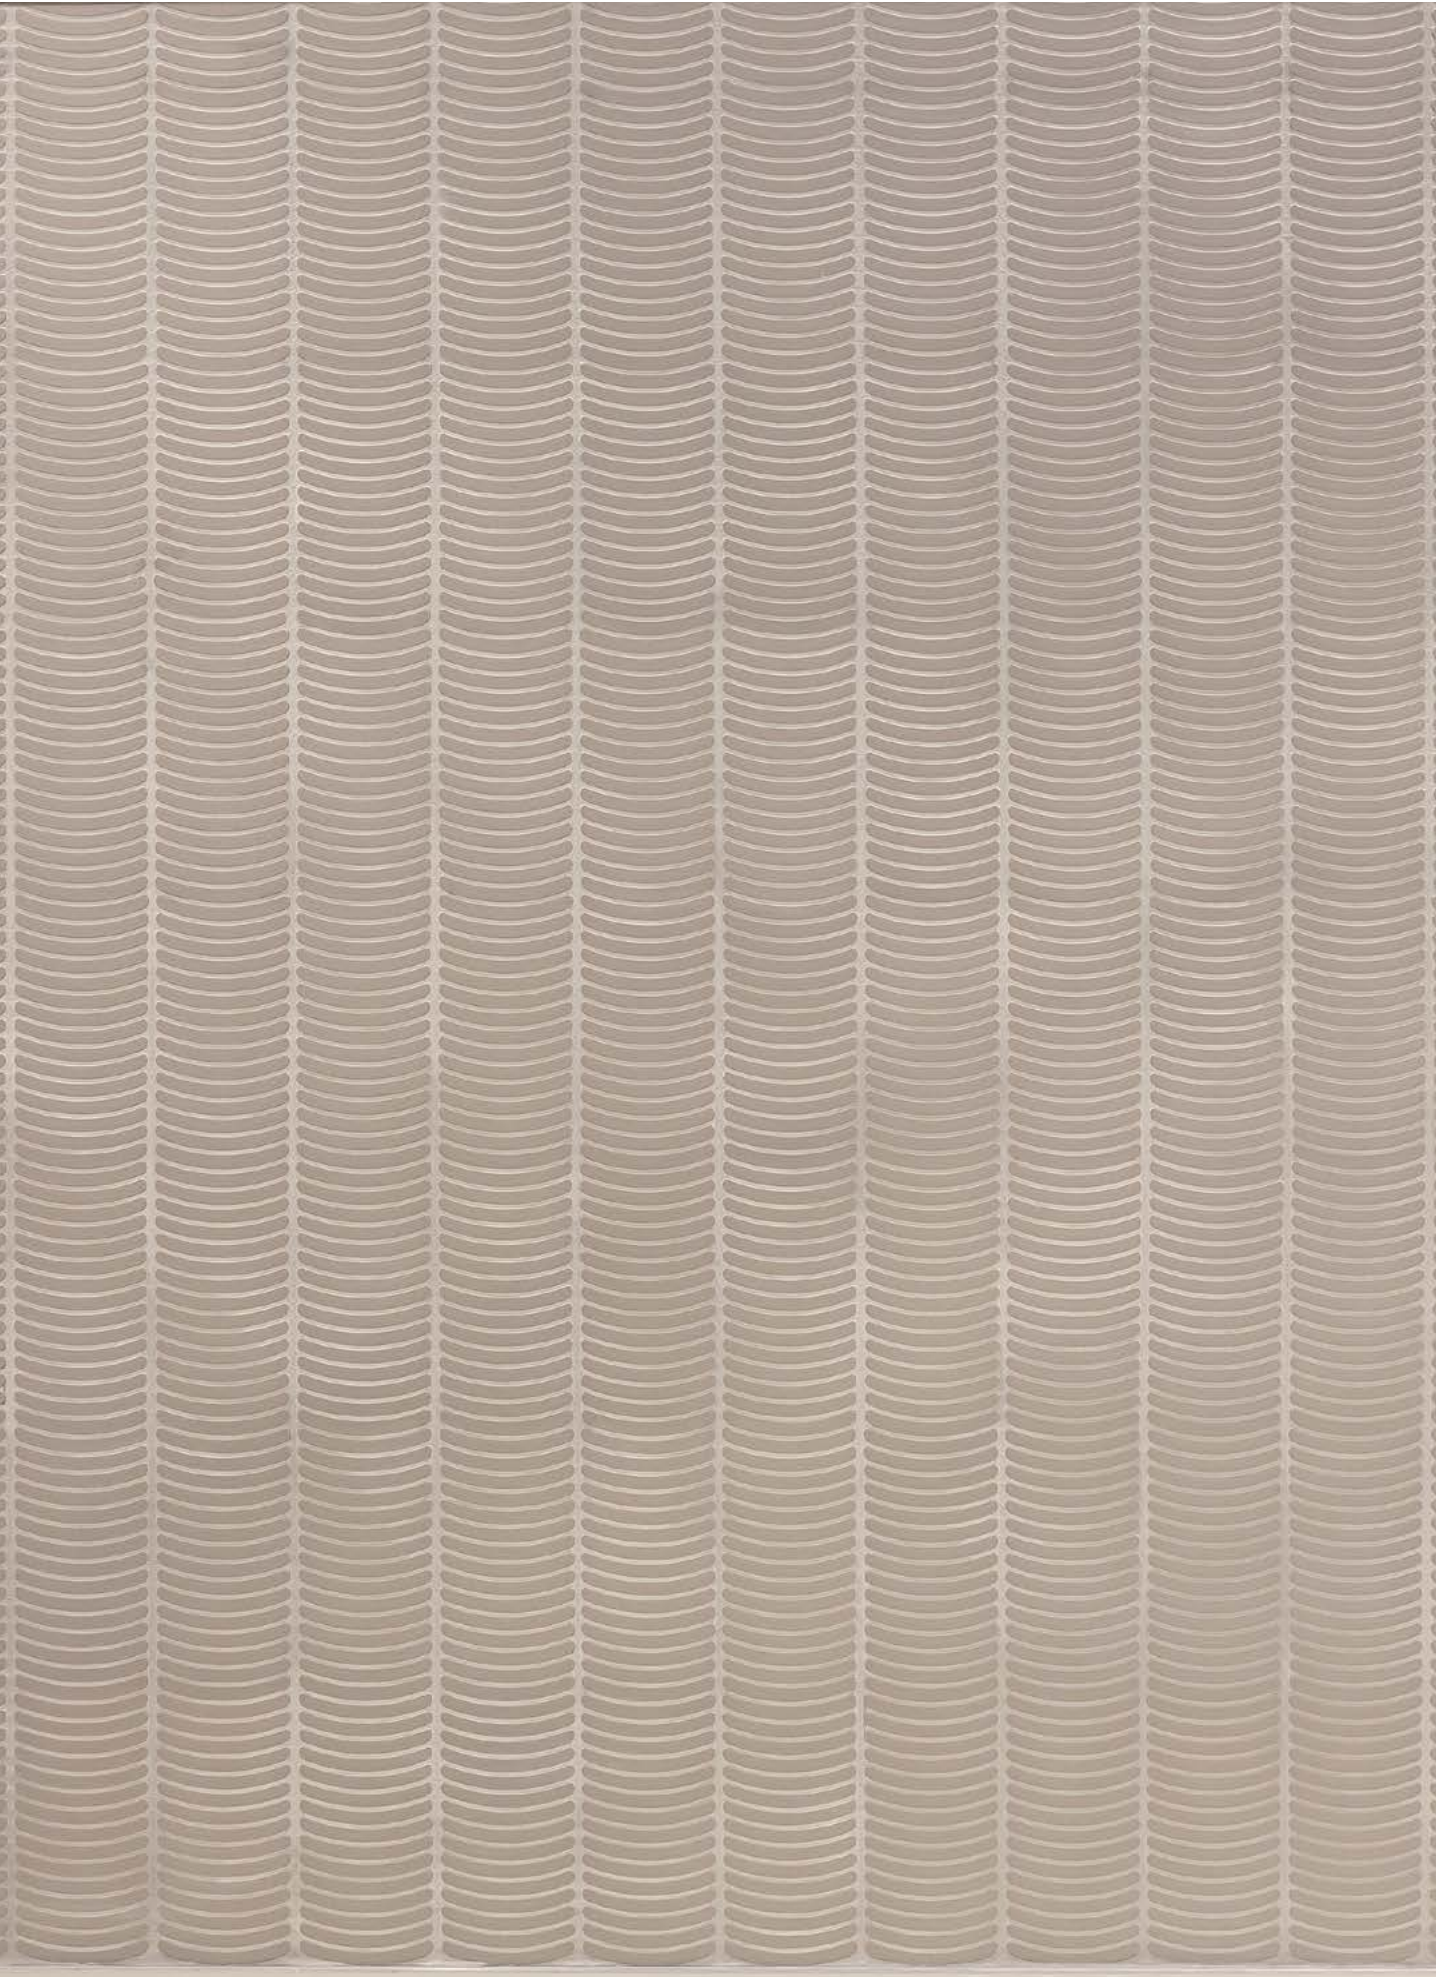

The designer explored several shapes to recreate the tiles' section and achieve the desired mosaic effect. The end product is a tile made of 9.5x18.5 cm elements that mimic curved Chinese roof tiles. These elements are grouted to create visual continuity, like in a mosaic.

Kimono Collection

La collezione Kimono si ispira alla composizione degli abiti tradizionali giapponesi, indossati attraverso un complesso lavoro di nodi e piegature come una sorta di origami che contribuiscono a creare un disegno geometrico fatto di tessuti e fantasie differenti. La collezione rievoca nella tridimensionalità un prodotto storico dell'azienda dalla caratteristica texture materica e lucida data dalla sovrapposizione tradizionale di smaltature. Kimono propone una resa artigianale con superfici lucide e tattili attraverso materiali e lavorazioni contemporanee.

The Kimono collection, designed by Federica Biasi, was inspired by the traditional Japanese garment held in place by folds and colours. The colour palette was carefully created, focusing on individual shades and their combination. The result is a palette of eight hues, spanning from blue to intense green and from earthy shades to more neutral ones, for a whole world of possibilities, where even the grout becomes a distinctive element of a space.

La collezione rievoca un prodotto storico dell'azienda, chiamato Millerighe, dalla caratteristica texture materica e lucida ottenuta attraverso la sovrapposizione di smaltature. Kimono propone una resa artigianale con superfici lucide e tattili attraverso materiali e lavorazioni contemporanee. La collezione si compone di due formati distinti e con due diverse finiture superficiali una liscia e una tridimensionale, progettati per offrire superfici uniche e altamente personalizzabili.

This collection's three-dimensionality evokes another iconic Decoratori Bassanesi product, called Millerighe, with a textured and polished finish resulting from traditional glaze overlaps. Contemporary materials and manufacturing processes ensure Kimono tiles' artisanal quality and glossy, textured surfaces. The collection comprises two formats and a texture, ensuring unique, highly customisable surfaces.

Rain Collection

La collezione Rain si ispira alla natura, stilizzandone l'essenza in un mosaico semplice ma evocativo. Il tema della pioggia è reinterpretato con un segno grafico unico, che varia in direzione e spessore, creando composizioni che vanno dall'essenziale all'artistico. L'elemento grafico, disposto in modo asimmetrico e casuale, richiama la naturale imprevedibilità della pioggia.

The Rain collection's simple yet evocative mosaic tiles capture nature's essence. It offers a new take on the rain theme with a pattern that changes with the laying direction and thickness, creating minimalist and artistic compositions alike. The graphic element is positioned asymmetrically, evoking rain's natural unpredictability.
